How Do You Know

those baking powders are made from alum?

Their lower price, their unfamiliar names, generally betray them.

But it is not necessary for you to know. You know that Royal does not contain alum, that it makes the best food, that it is pure and healthful. You know that alum powders are unhealthful. This knowledge is sufficient to enable you to protect yourself and your family from alum baking powders and the evil results which are certain to follow their use.
